

I would like to voice an objection to the planned broadcast of the anti-Kerry documentary scheduled to run days before the election. Sinclair's decision to force their stations to air the anti-Kerry documentary is a clear example of one sided media.

Sinclair uses the public airwaves free of charge, and is obligated by law to serve the public interest. Large powerful companies must not be allowed to control the airwaves. It is the duty of stations using the free public airwaves to show both sides of every story.

Sinclair must not be allowed to broadcast this "documentary". It is not ethical to manipulate the airwaves in this way. Thank you.
